- Product made from renewable raw materials
- Clean room manufactured (clean room class 7)
- Individually packaged, non sterilised or sterilised
- For easy and reliable transferring
- Wide opening prevents clogging
- Suitable for use in laboratories and clean rooms or for sampling
- Complies with EU food requirements and FDA regulations

Single-use powder funnel Bio made of white bio polyethylene, produced in clean room class 7 (10,000) and individually packaged for disposable use. Available also sterilised.

The disposable powder funnel has a short, wide discharge and is suitable for transferring powdered samples and materials, granulates and suspensions as well as other liquids.

The wide opening of the disposable powder funnel prevents the powder or granulates from clogging while dispensing. That makes this practical and hygienic pouring aid a helpful accessory for sampling or in laboratories.

In combination with a filter paper the disposable funnel is also well suited for filtering.

The sturdy disposable funnel for powdered substances is ideal for use in laboratories and clean rooms or for sampling. It can be used in pharmaceuticals, chemistry and cosmetics and the food and animal feed industries, as well as all areas where special purity is important.
