

Tacta

Mechanical Pipettes

Product Information

Tacta is a premium mechanical pipette featuring superb comfort and reliability. Designed with comfort in mind, Tacta makes pipetting effortless and safe, while producing accurate and reliable results time after time. Tacta is made from carefully selected materials, with each component designed to meet the highest standards.

Description

Tacta is a premium mechanical pipette available in volume range from 0.1 to 10 000 µl in single channel models, and from 0.5 to 300 µl in multichannel models.

Features

- Low pipetting cycle forces reduce the risk of WRULD (Work Related Upper Limb Disorder)
- Ergonomic design for comfortable pipetting
- Optiload feature in both single and multichannel models for easy and light tip loading with perfect tip sealing
- Optiject soft tip ejection feature detaches the tip in a smooth, controlled manner
- Optilock's dual-function volume locking prevents accidental volume changes
- Easy-to-read, four-digit volume display helps to set exact volumes
- Color-coding of volumes to ease the selection of corresponding pipette tips
- Safe-Cone Filters available for models above 10 µl with convenient built-in filter ejection mechanism
- Fully autoclavable without disassembling
- Simple to clean and maintain with only three parts to disassemble

- Easy calibration adjustment with adjustment scale ensures accurate results, also in cases where factory calibration does not apply, for example when pipetting viscous liquids
- Materials have high chemical and UV-resistance to ensure a long life span for the pipette

Intended Use

Manual liquid handling for volumes ranging from 0.1 µl to 10 ml.

Technical Data

Technical Specifications		Safe-Cone Filter ejector	Built-in ejector
Weight	79 g (1-ch, 1000 µl) 138 g (8-ch, 300 µl)	Limitations	The accuracy and precision values are valid under the controlled conditions described in ISO 8655. Test temperature: +20°C to +25°C +/-0.5°C Humidity: 40-70%
Length	138 mm (1-ch, 1000 µl) 240 mm (8-ch, 300 µl)	Instrument use outside +20°C to +25°C	When using instruments outside this temperature range, the correction factor for water density (Z-value µl/mg) must be used.
Autoclavability	Fully autoclavable (121°C, 20 min, 1 bar)	Transportation conditions	Temperature: -50°C to +50°C Humidity: 10-90% Shocks: <10 G
UV-resistance	High Wavelength: shortwave ultraviolet (254 nm) Power: 2x20 W (twin tubes) Distance from lamp to table surface: 620 mm Fixture type: UVP XX-20S	Long-term storage conditions	Temperature: -20°C to +40°C Humidity: 10-60%
Pipetting principle	Air displacement	Warranty	2 years
Pipetting modes	Pipetting (P) Reverse pipetting (rP) Post-delivery mixing		
Stand options	Carousel Stand for 6 pipettes Linear Stand Pipette Holder for one pipette (included in the pipette package)		

Volume Adjustment

The calibration of Tacta is based on ISO 8655-6: gravimetric test method for volumetric instruments. It has been factory-checked using the forward-pipetting technique and certified according to ISO 3696 at 22°C using grade-3 distilled water.

The pipette calibration should be adjusted when necessary, for example when reverse pipetting, when pipetting liquids other than water, when using the pipette at high altitudes, or when the geometry of the tip you use clearly differs from standard tip geometry.

For accurate adjustment results, please refer to the table below.
