V-LINE

The new formula for the storage of hazardous materials

asecos V-LINE

THE NEW FORMULA FOR THE STORAGE OF HAZARDOUS MATERIALS

asecos V-LINE safety storage cabinets have been developed and designed according to consistent objectives:

-))) Direct access to all stored containers.
-))) Maximum safety in the storage of hazardous materials.
- >>> Perfect integration into existing work flows.
-))) Ideal use of existing space.
- >>> Highest comfort in use.

The result is a unique worldwide range of safety storage cabinets featuring impressive highlights.

The right cabinet for every application purpose

The V-LINE cabinets are available with one or two vertical drawers, in laboratory or industrial designs and with various interior equipment to choose from. Depending on the desired storage volume there is a choice of two cabinets with different widths.

The **45 cm-wide** V-LINE cabinet is equipped with one vertical drawer. The **81 cm-wide** model is equipped with two vertical drawers that accept double the quantity of hazardous materials. The height of the storage levels inside the drawer can be adjusted individually.

Cabinet colours

Within a laboratory environment, V-LINE cabinets with a **classic unicolour design** and their powder-coated finish fit in perfectly.

The V-LINE cabinets blend into industrial environments (such as workshops or workrooms) perfectly due to the **bi-colour** design.

Cabinet body:

Front Vertical drawer:

Innovative technology

The name V-LINE originates from the innovative vertical drawer technology. The vertical drawers are controlled by an electric motor, which enables them to operate easily. The double-sided access offers to overlook and reach stored containers conveniently at any time.

Electronic opening and closing

The vertical drawers of the V-LINE cabinets are easy to open and close at the push of a button, without additional physical efforts. The drawers glide softly and quietly out of and into the cabinet body, driven by the electric motor.

Optimum integration and use of space

Since fume hoods and benches are normally deeper than safety storage cabinets, the space behind the cabinets has remained unused until now. The common practice is to install safety storage cabinets with their fronts flush with those of laboratory fume cupboards or work benches. With a depth of 86 cm, V-LINE cabinets now use the space that conventional hazardous material cabinets have left unused so far.

Application example - laboratory

asecos V-LINETAKING SAFETY A STEP FURTHER

Maximum safety while storing hazardous materials was an ambition for the asecos developers.

Various requirements would have to be fulfilled by the new V-LINE cabinets: **Type-tested fire resistance of 90 minutes**, automatic drawer closing when the cabinet ist not used actively and electronic vertical drawers with an intelligent stop function in order to prevent being trapped.

Due to the standard automatic closing system, the vertical drawers of the V-LINE are **always safely closed**.

When not in use the drawers close automatically after approx. 60 seconds. In the event of fire an electronic temperature sensor triggers the closing of the vertical drawers.

Even in the case of a power breakdown, a battery buffer ensures that the drawers close safely and automatically at any time.

Furthermore, the standard stop function of the electronic vertical drawers detects resistances and reacts immediately. Whenever the drawer is being blocked by an object while opening it will stop and provide an acoustic signal. An acoustic signal is similarly emitted if the vertical

drawer is blocked while closing. In this case the drawer stops immediately and opens again slightly. **The risk of being trapped is eliminated.**

Thought has also been given to the possible risk of tipping over. If one of the vertical drawers of the two-drawer cabinet is open, the electronics detects this and blocks the second drawer in the closed position. The inadvertent opening of both drawers is excluded. (see picture below)

Locking the cabinet with the cylinder lock, can be integrated in an existing locking system, blocks the motor so that the vertical drawers can no longer be moved. This reliably prevents unauthorised access to the stored hazardous materials.

MAXIMUM COMFORT

FOR THE USER

Same storage volume as standard cabinets – but only half the cabinet width

With a width of just 45 cm, a V-LINE safety storage cabinet can hold almost the same quantity of hazardous materials as a 90 cm-wide safety storage cabinet with drawers.

Cabinet	asecos V-LINE Vertical drawers with shelves Width: 45 cm	asecos S-LINE Wing doors with drawers Width: 90 cm
Storage levels	6	6
Total storage volume of 1-litre bottles (ISO 4796-1)	126	138

Flexible storage

Cabinets of the V-LINE make it easy to adapt the storage levels to current needs. The shelves can be adjusted by the cabinet user to any desired division with increments of 25 mm.

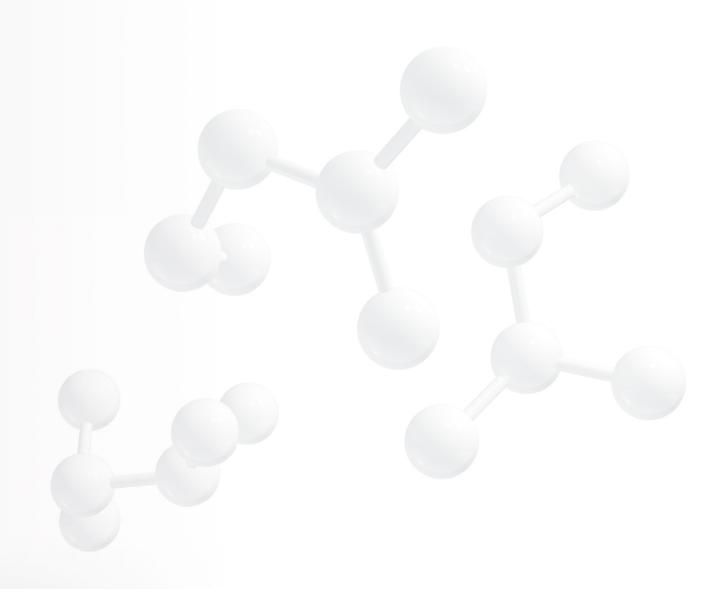

Application example - industry

ORDER INFORMATION TECHNICAL DATA

Safety storage cabinet

Pure white (RAL 9010), interior equipment with 5x shelf, 1x perforated insert, 1x bottom collecting sump (sheet steel powder-coated)

Order No. 35034-005-35101 4

(Guard rail system optional)

Safe and approved storage of flammable hazardous substances in working areas

Function / construction:

- · Robust construction and longevity: stable, high quality and scratch proof cabinet body with powder-coated surface
- Electronic opening and closing: the vertical drawer opens and closes at the push of a button
- Perfect access: the vertical drawer provides an overview and simple access to the stored containers
- · Always closed: standard serial automatic door closing after approx. 60 seconds with visual and acoustic signal for drawer closure
- · No unauthorised use: vertical drawer lockable with cylinder lock (integration in an existing locking system possible) and locking state indicator (red/green)

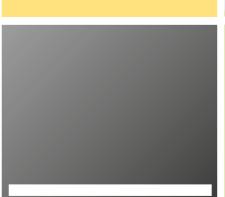

- Easy alignment: adjusting aids to compensate for uneven floor
- Supply and exhaust ventilation: integrated air ducts ready for connection (DN 75) to a exhaust system

Available equipment:

- Anti slip rubber mats
- Shelves with 50 kg load capacity
- Perforated insert useable as storage area
- Guard rail system
- Bottom collecting sump
- Tray shelves with load capacity of 50 kg
- Sump inliner (PP)

Ready for dispatch within

TERMS AND CONDITIONS

Dimensions, weights and illustrations Technical data such as dimensions and weights shown in the catalogue are approximate values. Illustrations may contain special equipment. Products will be delivered without any decoration material.

Colour key: ready for dispatch within

The delivery times specified in the catalogue are average values. The precise delivery times are to be taken from the detailed offer and/or order. Information on the period of having the goods ready for dispatch refers to order quantity usual in trade. For larger quantities, the delivery time can be delayed accordingly.

Customs duty / documents dispatch

In case any country-specific extra costs occur for an order (like for example customs confirmation, express shipping of documents, chamber of commerce (IHK) confirmations, etc.), the charges will be passed on accordingly.

asecos Warranty

- Upon conclusion of an asecos service and maintenance agreement (BasicPlus tariff) with a fixed term of 5 years, you will get a warranty extension for amaximum of 5 years for your safety storage cabinet according to EN 14470. Detailed information upon request.
- Upon conclusion of an asecos service and maintenance agreement (PREMIUM tariff), you will get a warranty extension for up to 10 years for your Q-LINE or V-LINE safety storage cabinet.
 Detailed information upon request.
